# From the President

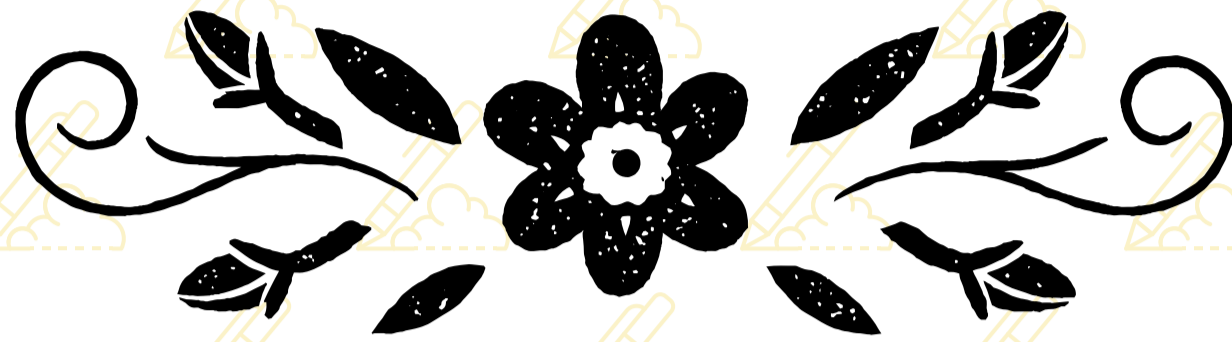

**Prof. Dr.  
Satyajit Chakraborty**

Greetings to all the readers!

In this rapidly changing world, where many experiences and relationships often fade as we move forward to newer landmarks and achievements, I would like to take out some time and thank everyone who has been a part of this long journey. The seeds of this institute were sown in 1989 in the IT hub of Kolkata – Sector V, Salt Lake.

Since then, the students and staff have left no stone unturned in striving for the very best and it is their hard work, sincerity and creativity that has made us the best private engineering college in West Bengal today. Considering the success of IEM Kolkata, we extended our ventures to UEM Jaipur and UEM Kolkata. I am proud that the IEM Magazine committee has taken up the initiative and is continuing the legacy to display the innovative ingenuity of our students and alumni. I hope their effort is appreciated when the often-masked talent of some of the best brains of the country is unveiled. Happy reading!

# From the Director

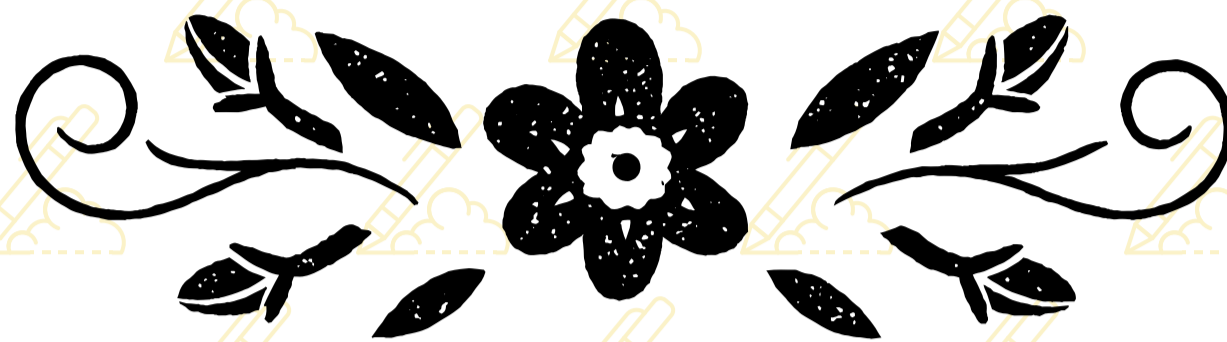

Education is the most powerful weapon with which you can change the world. This inspired us to establish IEM for shaping young minds through technical and managerial excellence. IEM was founded in 1989 and since then it has grown to become one of the best in the country producing jewels in various fields.

**Prof. Dr.  
Satyajit Chakraborty**

Our extended ventures in Jaipur and Rajarhat are doing equally well. We have always focused on an all-round development and I am proud to say that this magazine has proved to be a fine example of the creativity of our students, be it poetry, painting, photography, dance or music. I wish all the readers the very best and hope they keep the institute flag high.

# Editorial Desk

Prof. Sanghamitra Poddar

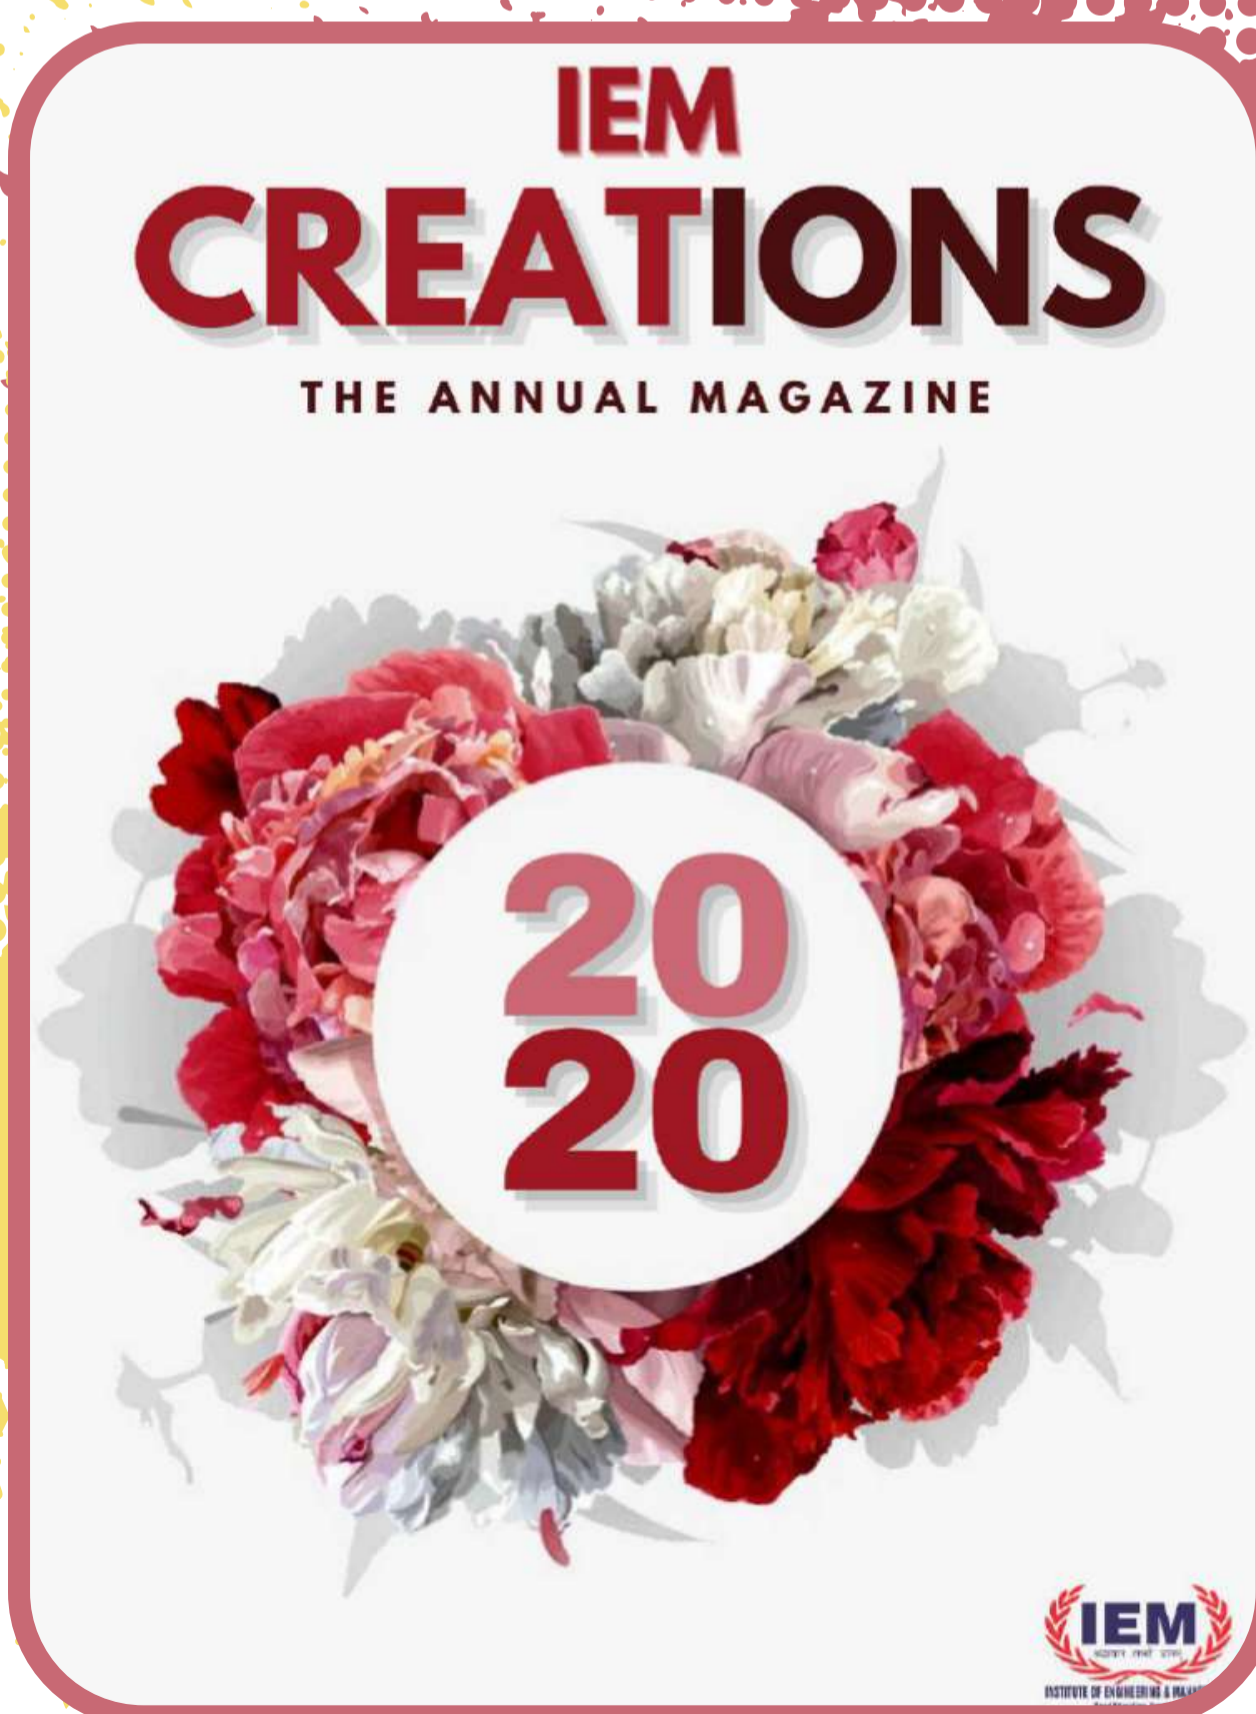

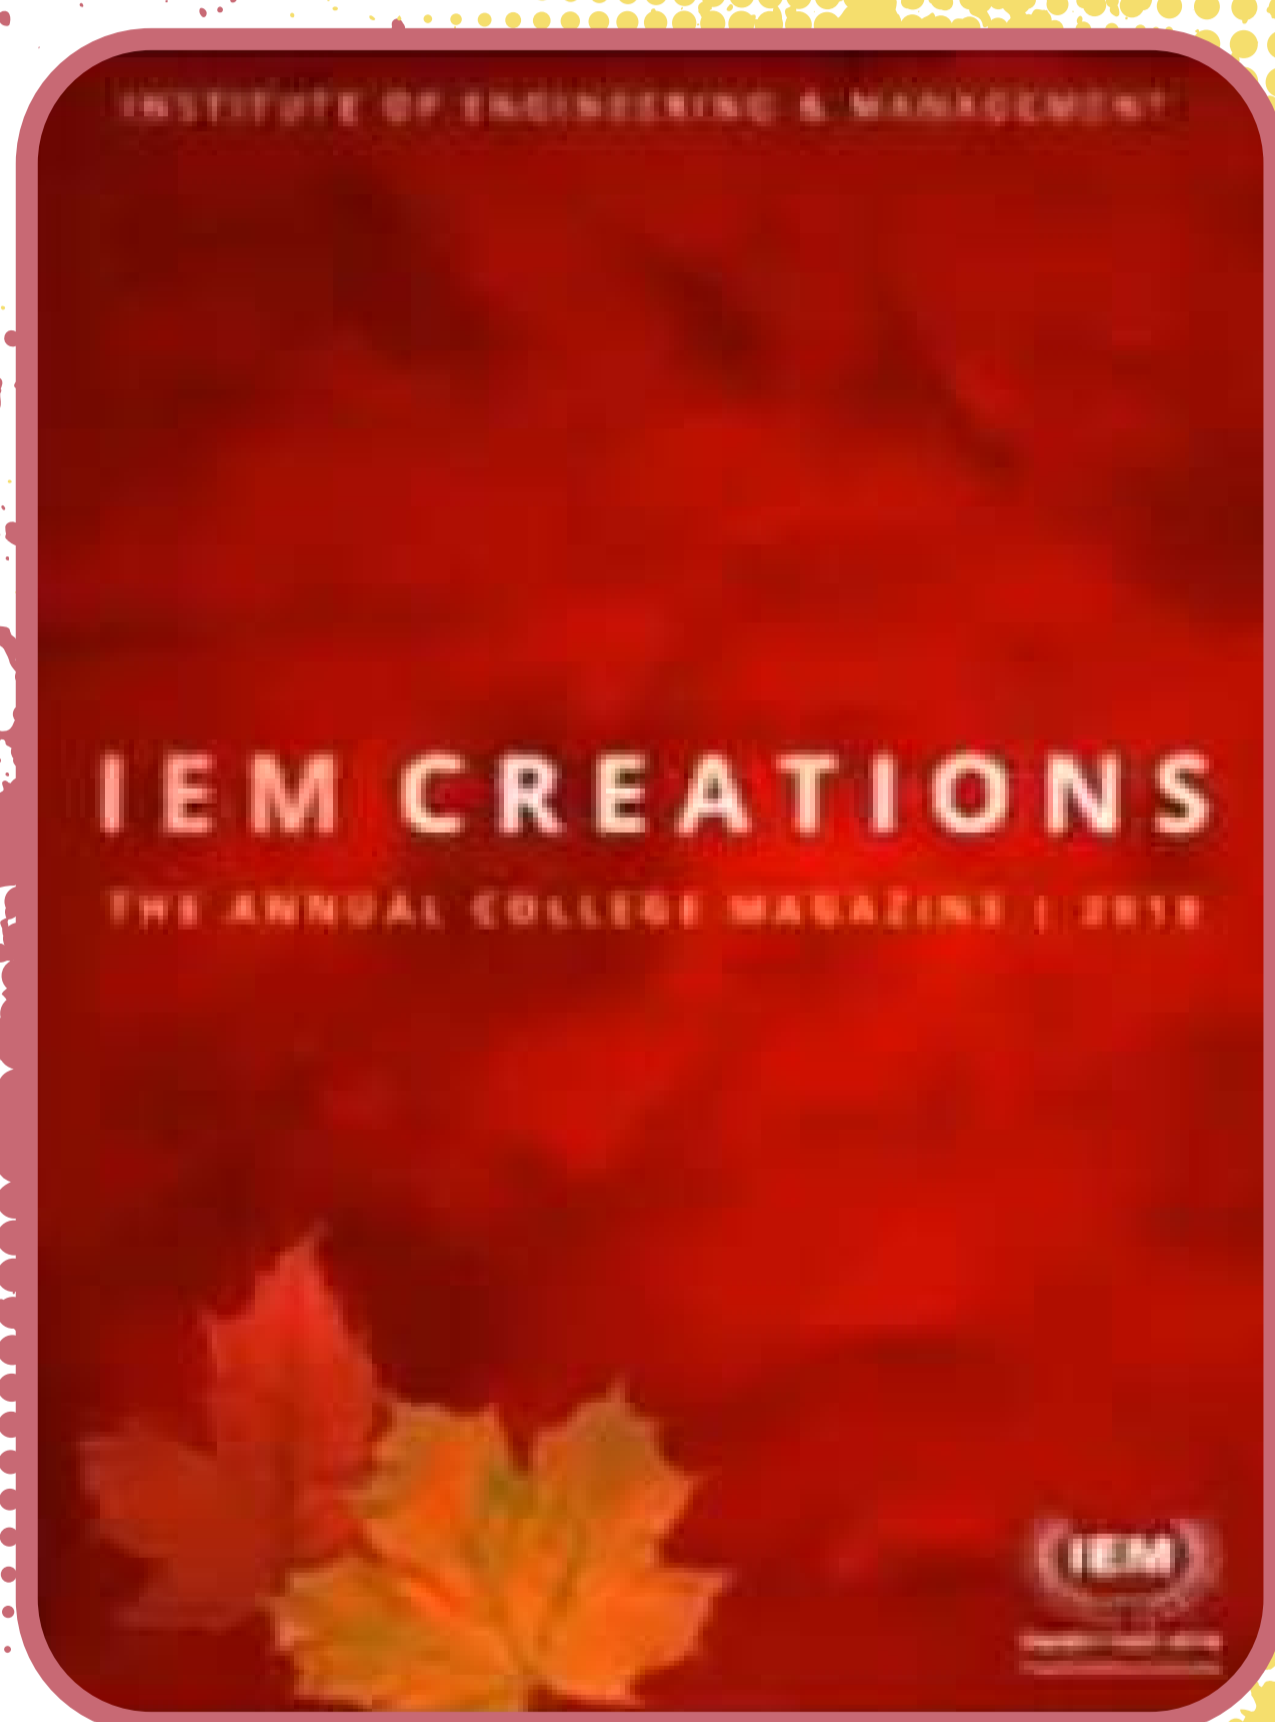

Kousheya Das

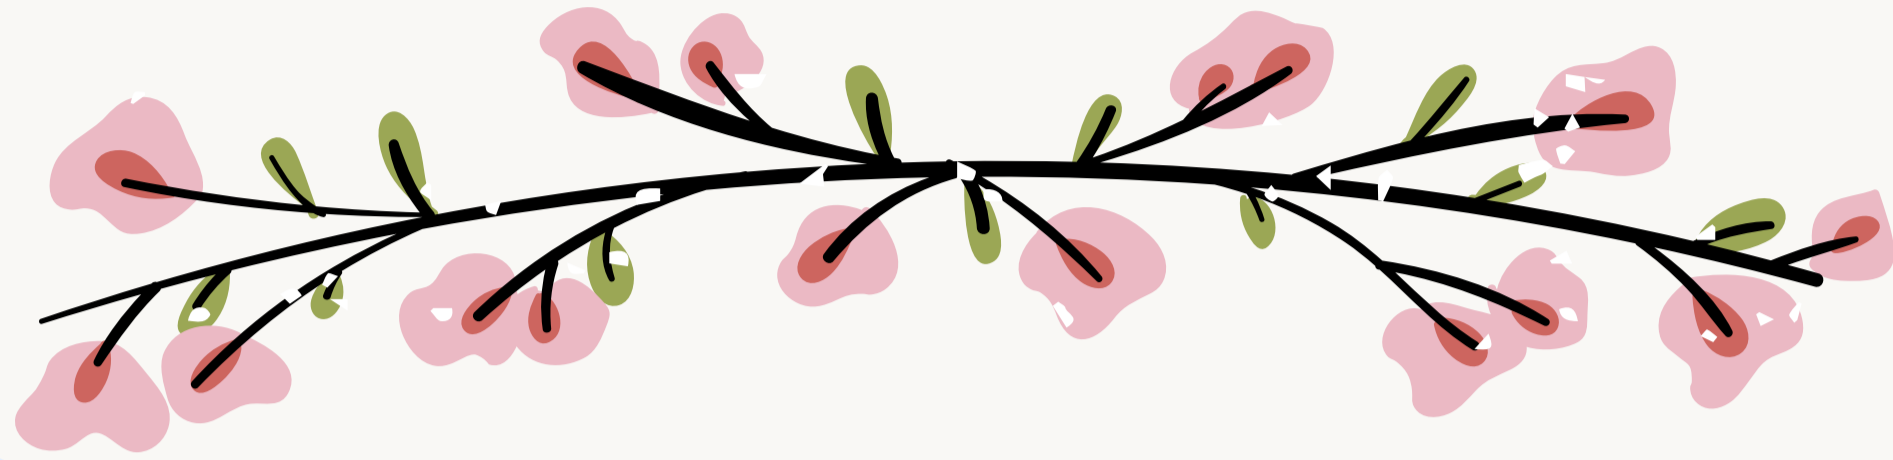

Zainab Sultan

It was an honor to be a part of the Editorial Team for Memories@IEM, the Alumni Magazine team. That being the Editors of a magazine could involve so many different aspects was something unknown to us back then. For months, we were floundering about, without a clue how to get this gigantic task done. There were months of missed deadlines, a plethora of new things that had to be learned, minute errors to find and correct, choices to make, and decisions to take. Being a part of the magazine was a daunting, yet enjoyable affair. Kudos to the fantastic team of incomparable talent with special mention to Aneesh Kar and his graphics team. Thank you for helping us turn something we had always wanted to do into something we did. Thank you for giving us a venture so wonderful to look back on. A special shoutout to our respected Alumni, for their invaluable words and for sharing their precious moments with us. We would also like to thank Professor Sanghamitra Poddar for her constant support. This magazine was something that everyone enjoyed working on. and nothing could be a better reward than our readers enjoying it too.

# Blast from the Past

“ —

Life at IEM has been a roller coaster for me. Starting with the “Oh no, uniform” to the teary goodbyes, 4 years just went by in a flash. Getting up every day to go to college more, and attending the morning classes half-awake the first year went by in a flash. But my real journey started when I was in 2nd year. When I met Malay sir and SP ma'am. I got to know seniors who were like elder siblings and I was fortunate enough to have juniors who treated me like family. But somehow with all the fun and all the thousands of events, my colourful and somewhat musical college life came to an end. Only one thing you might leave IEM after graduation but IEM and its family never leaves you.

--Ahon Saha  
Junior software engineer,  
full-stack at CTS

— ”

“ —

I was merely a scared soul when I stepped in among 1100 other students in that tall building and then slowly got acquainted with my fellow mates, some amazing teachers and ever helpful seniors. IEM has shown a plethora of emotions and ways to deal with it, including the worst possible semester result, the first attempt to write a code and many others.

At here I discovered my area of interest in Technology and much more. Finally I cannot thank enough to one of my favorite teachers for her immense support and advices beyond studies which helped me become confident.

— **Aishika Chakraborty**  
**Assistant System Engineer, TCS**

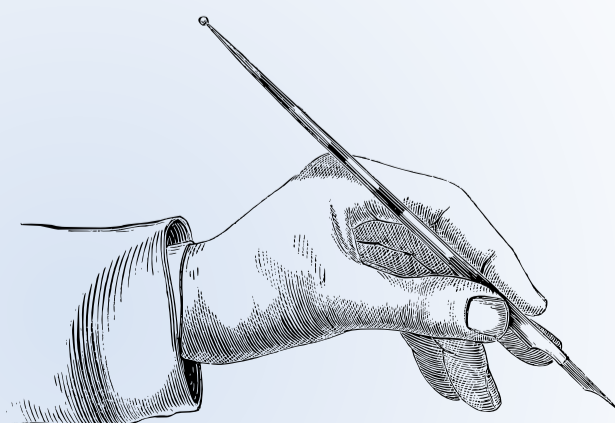

“ —

I always wanted to start over a new phase of myself in college. It seems with limited resources and a new environment was a challenge. That ain't stopped us from being what we are now. My college did give me opportunities that were very vast at a global level and it made me a better personality to be understood. I will always be grateful to my Alma mater for its existence in our lives. Thank you.

“ —

To the institute, who has given me a amalgamation of lifetime experiences, I still remember the day on August 2017 when I entered the gates of IEM, with a nail biting confusion and perplexed on how my journey would turn out to be in the next four years. My college life has been a roller coaster ride with ups and downs but most importantly I enjoyed every bit of it with amazing set of professors to guide and friends to treasure memories with. One thing I'll take with myself is to never stop dreaming, never stop learning and always taking responsibilities. Thank you for everything.

-- Anushka Gupta  
Analyst in technology consulting- EY

— ”

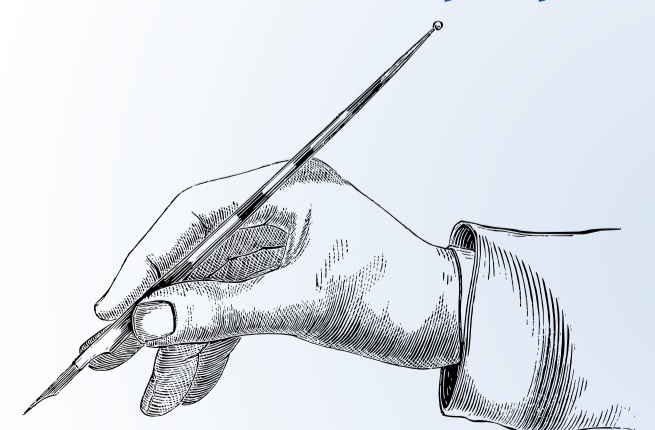

“ —

IEM holds a special place in my heart. Although there were lots of privileges, I had no idea that it was somehow getting back to square one like wearing uniforms & all. But once I got familiarised with it, I understood what's the importance of all these regulations. The entire journey of 4 years was extremely colourful. Really fortunate to be a part of this family

-- Arunangshu Pramanik  
Batch of 2015-2019  
Senior Software Engineer at Apisero

“

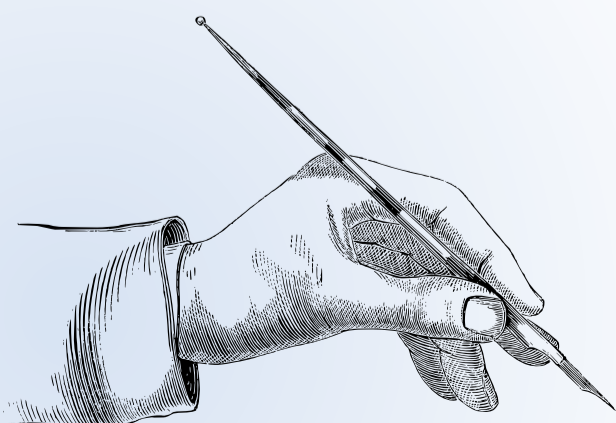

I This is a place which helped in my overall growth. This place helped me made some great friends and memories. The college fests were one of the best in town and being in the core organizing committee for these fests helped me gain insights into the multiple aspects of event and manpower management. Countless memories and daily college activities helped create countless memories filled with fun. The time spent in labs and discussion and guidance from our professors have helped us excel in our professional fields.

--Harsh Anand  
RCO Manager, Investigations, Amazon

“

I was fortunate enough to spend 3 years of my life in IEM. These 3 years just went by my eyes like a flash with all those bitter sweet moments in my class room, our campus, the tea shops and most significantly Malay sir's cabin. I was fortunate enough to have been blessed with so many friends and a second place to call home, where our elders gave us wisdom and our friends and juniors gave us companionship.

- Shrestha Majumdar (ECE 2018-2021)  
CO-FOUNDER AND COO INTERNBAZR

“ —

It's a myth that "Things we learn in classroom are never used in practical". IEM gives you the platform to use it and pursue your passion in the aspired industry. Some constraints, some apprehensions but lots of expectations and excitement: My journey at IEM started with all these emotions. At the end of two years, it was beyond the expectation I had set for myself. "MBA is all about learning":

Whether it is inside the class room or outside the classroom through events and various clubs & committee responsibilities (I was involved with cultural, student relation and corporate relation activities). From everything that I have learnt here, If I have to pick the 3 most important things, then those will be- "Patience" Confidence" and "Effort".

**-- Ms. Simpee Banerjee**  
**Customer Service Associate Concentrix Kolkata,**  
**West Bengal, India Batch: 2017-2019**

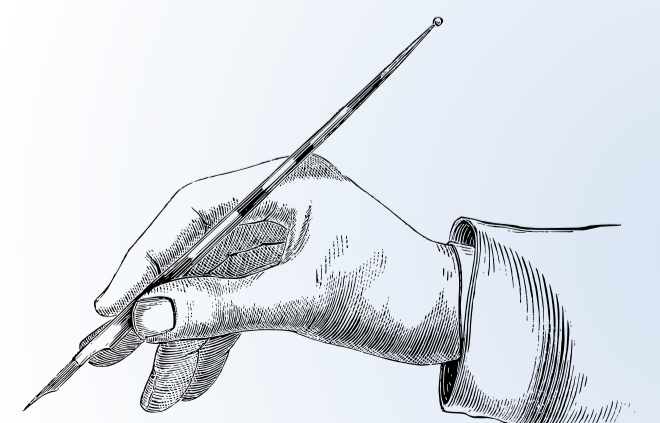

— ”

“ —

Dear Alma Mater,  
 the last time I saw you, you stood all tall and strong  
 with that blue glass coat around you, reflecting  
 brilliance, to the pompous city of Kolkata.  
 You taught me the toughest lessons in the toughest  
 way possible, taught me how to bounce back higher  
 and gave me a canvas of smiles to look back, on the  
 brightest days of my life.  
 I can never thank you enough, for all of that and more.  
 Until next time,

**- Raima Ghosh**  
**Research Analyst, GreyB Research Pvt. Ltd.**

— ”

“ —

Finding the right path to success at the right time is really very important and for that way I had selected IEM. The friendly environment, the systematic approach towards imparting education at IEM made me a competent individual. The wide range of activities- both curricular and co-curricular- along and the support from IEM is really very helpful for my future.

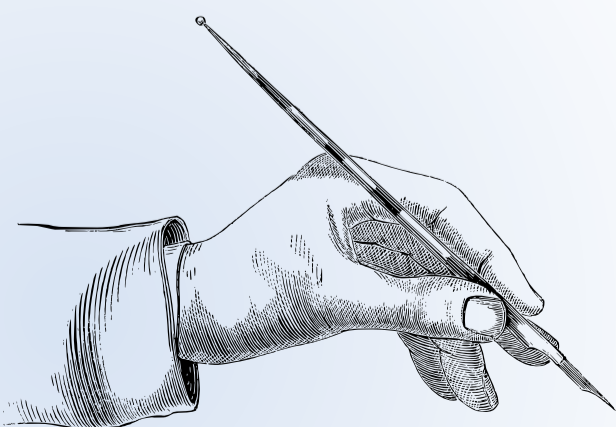

The faculties are really very kind and approachable when any need arises. In AIMS we are trained for our placements and because of that I was placed in one of the reputed companies for my internship. Today, if I am in good position it's because of what I have learnt from IEM. Lastly I am really proud to be an IEMIAN.

**--Mr. Pinak Goswami**  
**Sales Supervisor, Berger Paints (I) Ltd Batch: 2010-2012**

“ —

Time flies like an arrow. The days I spent at IEM were exactly like this proverb. My classmates and me have put a great deal of painstaking efforts into studies and all our energy into unforgettable events and activities. Unlike its relaxing surroundings, academic life at this College has been filled with learning challenging. My first year in this College was flooded with assignments, quizzes, presentation, papers and exams. However, with the guidance from enthusiastic teachers all the efforts made by me were rewarded at last.

**-Romak Mondal Batch: 2017-2019 Marketing**  
**Executive Sales and Operations Flipkart**

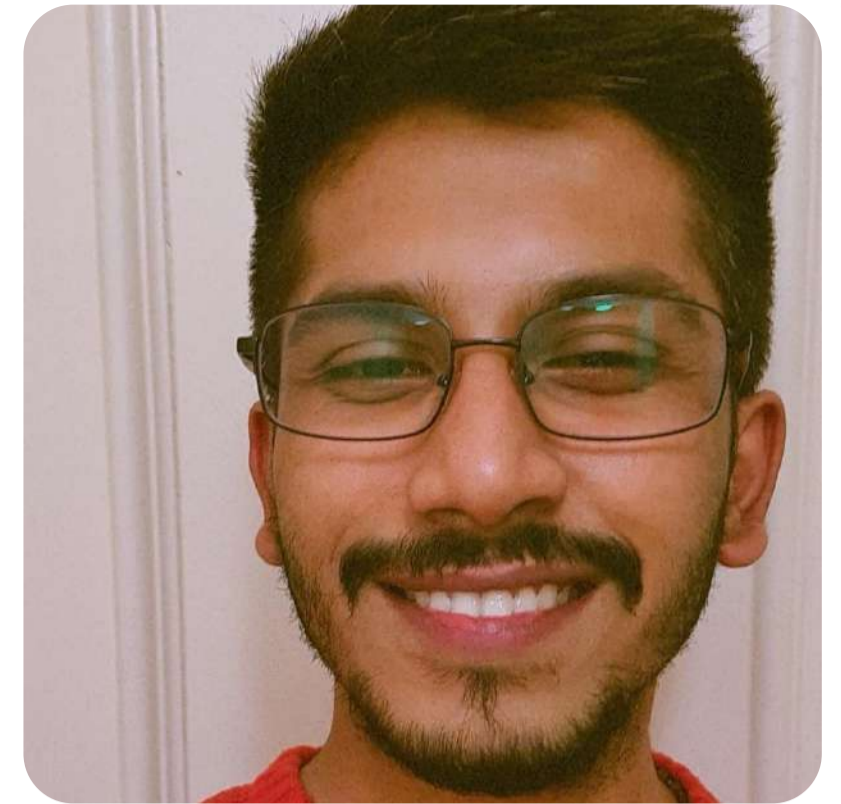

— ”

“ —

I won't rant much about academics here. IEM, to be honest has been a complete package for me - fun, fights, and other shenanigans. Made some lifelong connections, mentored by the coolest professors, did the worst mistakes, learned from them and got back up. What IEM has gifted me? Resilience. Things I miss the most? Mechanical engineering batch of 2020, the alu paratha shop on the banks of the management house, and futsal on the top floor. I will miss IEM and all the fun I had while I was there? Yes!

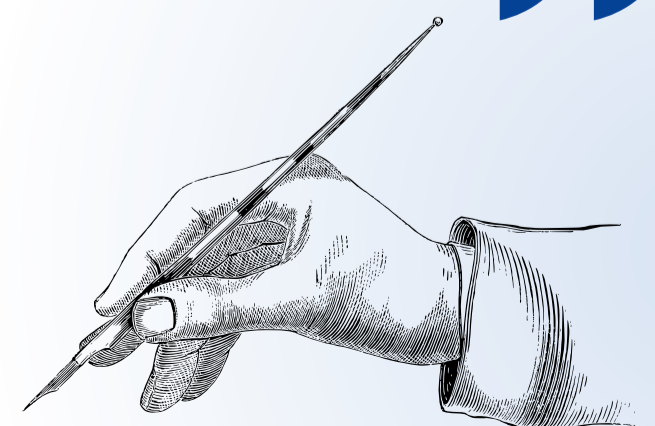

— ”  
- Samarpan Deb Majumdar  
University of Wisconsin  
Research assistant at Qin Lab

“ —

It is difficult trying to pen down my exact thoughts on the 4 years at college. I could call it 'stepping stone' but honestly, it was much more than that. College was a place where not only I got the opportunity to learn academically, but there was a lot of things I learnt which shaped me a better person. Be it participating in events and staying up late, or working with friends on research papers under the guidance of the faculties. What began as a 4 year engineering course, ended up a lot more than that. Life comes a full circle as I pen this note for this year's magazine after being a vital member of this very team the previous year. It's been worth it.

— ”  
- Sannoy Mitra  
Batch of 2021, Analyst at Deloitte

“ —

The experience was good. The curriculum and faculty helped me coordinate my career towards a more fruitful direction, with minimal fluctuations. The extra-curricular activities, festivals and workshops provided space to showcase our calibre outside the academic domain. Made multiple friends, connections for same, senior and junior batches which accelerated the diversified peer communication and helped us grow together to an established self-dependent entity.

— Soutrik Roy  
Product Support Engineer at SWYM

— ”

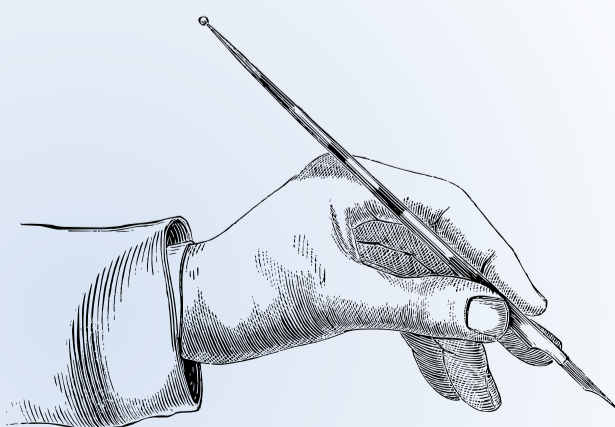

“ —

The 4 years I spent in IEM (or, I should say 3.75 years due to pandemic) has been a journey of immense growth in every aspect. Apart from academics, I discovered my managerial and graphic designing skills. The best part of college life was probably organizing fests and other events. Innovación, IEMPACT, IIFF, Marathon - to name a few. Spending days after days designing posters for the events while parallelly managing the other aspects was a challenge that I cherished. Working with like-minded people with different skillsets helped me a lot to extend the bandwidth of my knowledge.

— Sasmit Roy Chowdhuri  
Systems Engineer, TCS

— ”

“ —

It's always a hate-love relation with alma mater. We hated the college for its restrictions, the discipline, the orderliness imposed. Cause it is in the nature to break out from that. But looking back, those helped us to be who are today. The good part is that the life-long bonds, the relations made. I am glad that I was a part of this process. Grateful for the people who stayed beyond the years spent in college, also a gift to me for life.

-- Souham Ghosh  
Data Scientist, Rebrewed Technologies

— ”

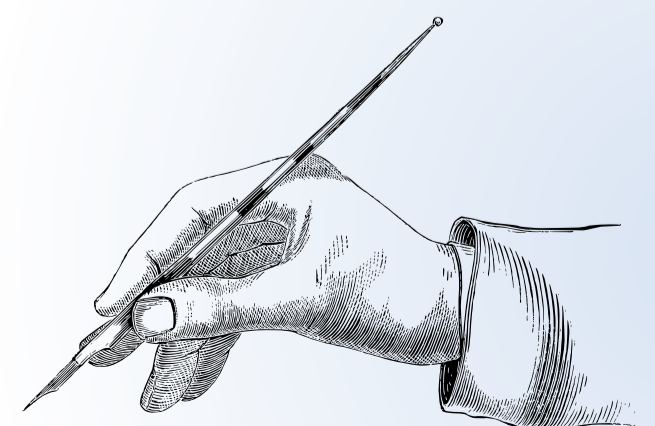

“ —

When I joined IEM, I never thought that this place with so many restrictions would one day, become home. I volunteered for multiple events organized by E-Cell and Innovación. However, IEDC Lab was a major part of my college life. All I can remember are countless projects, endless learnings, sleepless nights before exhibitions and pizza parties. I have got friends & seniors who have become like family. I left my college three years ago, but its essence and learnings are still embedded in what I am today..

-- Sourov Ghosh

— ”

“ —

To be honest, I thought that farewell would be giving a speech and pulling off a "Papa-Kahete-Hay" feat on the very Satya Sai Auditorium where we used to have morning assembly everyday (which I always missed by default) and not watching it on YouTube. But lockdown made me miss those assembly, the classrooms, the canteen more than ever. We couldn't leave with glory but let's hope when we come back we would be living that dream again!

--Suman Basu,  
Batch of 2017-2021

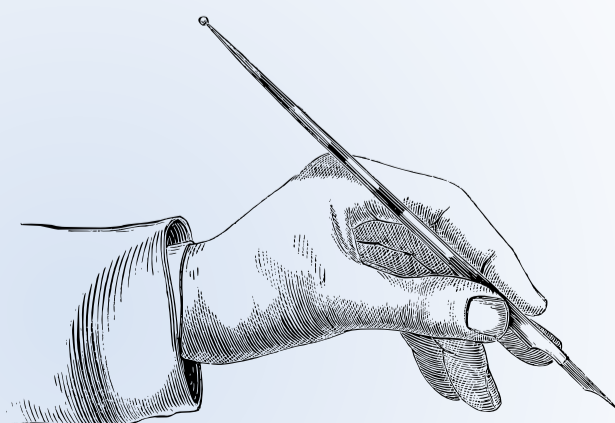

— ”

“ —

The quintessential transition from adolescence to adulthood is what defines the days of college most suitably. Those four years of my life has been a roller coaster ride of myriad emotions and experiences. My college has been the cardinal stepping stone into the real world and the knowledge gained from Institute of Engineering & Management has been a steady guiding force through the challenges of the corporate life. The memories these nascent years of my life is something I would cherish forever.

—Susmit Sarkar  
Analyst - Ernst & Young LLP

“ —

As the birds chirp off to sleep .  
And the moon lights the sky  
The clouds wash away all the sorrows  
And the nightlights guide you home .

As the dreams turn into reality  
And little insects warm up in the street lights .  
The planes takes off from the runway .  
Searching for the soul to reach back home .

The hours reduce into minutes  
And excitement turns into joy .  
For the little prince will soon be back home .  
YET ANOTHER TIME .

— Syed Wasif Moin  
Batch of 2020  
Assistant System Engineer at TCS

— ”

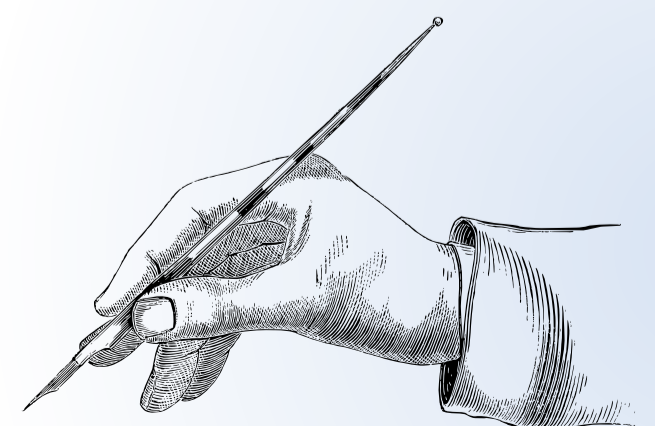

“ —

We were among the first batch of students who completed their graduation amidst a raging pandemic, sitting at home. A scar that all of us will be bearing through our life. But the one thing that kept us going were the memories associated with the college. Looking back, the friends, the time spent, the bonds, everything helped us to get going. Those continued after college too. If I have to compare, I had the craziest of my times in college rather than school

.-- Tiyaash Patra  
Data analyst , Cognizant

— ”

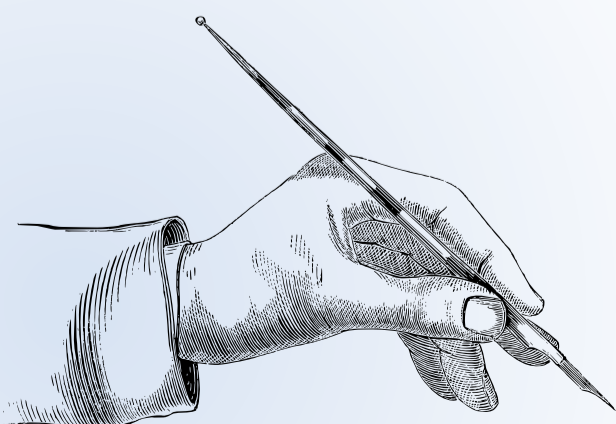

“ —

You only live now to make it better and most importantly learning essential life skills. Things I learnt during those days shaped me into what I am today. I will share one incident with you guys, which involves two students who even sneaked in the director's office to steal “mishti doi” from his fridge. This is but a small piece of the fun we had during our time in this, among other stories which are not shareable, let's just put it that way. I know a lot of you complain about the collage but trust me, the day it ends you will cry buckets outside those blue gates, emotions flowing like all the batches before you.

Looking back, I still remember my days in this "school" as you all might refer it as as the best four years of my entire life. Yes, I know you might stop to read that again, I assure you I speak in complete consciousness. I dare say that during my days in the place I indeed had a lot of fun, unlike the remote classes which you guys are having to deal with. I had big dreams while I was here, but I never really studied a lot while I was here, that does not mean I did not keep my GPA up, I did alright :P.

What did I love doing again? I remember being part of the college cultural activities, be it organizing events or writing documents, I spent a lot of time goofing with my seniors and my selected teachers whom I loved hanging out with. I assure you this as well that I hung with them cause they were nice in their own way. I used to have a ball while organizing these events, started as someone taking auditions for the dance team, went to organizing international conferences and quickly went on to get actively involved with organizing fests and other activities. We used to stay in the college with teachers and friends organizing, planning, debating how to make it better and most importantly learning essential life skills. Things I learnt during those days shaped me into what I am today.

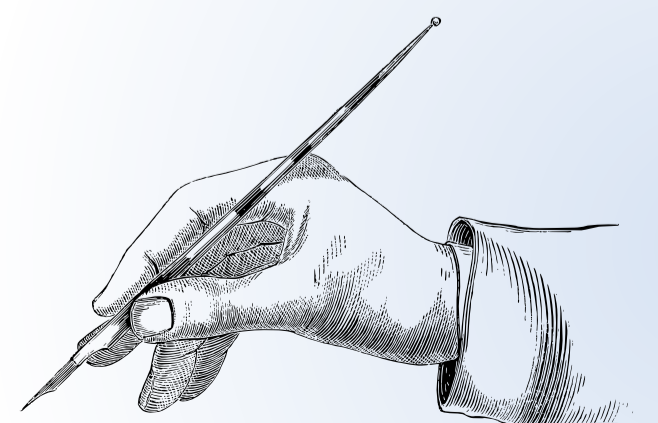

I will share one incident with you guys, which involves two students who even sneaked in the director's office to steal “mishti doi” from his fridge. This is but a small piece of the fun we had during our time in this, among other stories which are not shareable, let's just put it that way. I know a lot of you complain about the collage but trust me, the day it ends you will cry buckets outside those blue gates, emotions flowing like all the batches before you.

Huh, what was it that I miss so much? That painful urge to shake a leg, to perform, will I ever get a chance again? Those walls hold my joy when I had when I got my first job, the joy of me dancing on that small stage with everyone cheering, the joy of me and my friends doing bhashan dance to “ lolipop lagelu” playing from a laptop. These small memories are irreplaceable, I would not give this up for the world, if ever get the chance, I would go back to these days when I was happy and I had my teachers and friends all by me and had not a thing to care about. In this place, you will have a lot of fun if you know how to ;), so find the right people.

Dang, it has been a while, since I left the place behind, since I left my glory behind, since I felt the sense of pride of me walking into the halls and everyone recognizing me, since I felt the absolute honor of being the Vice President of IEM 2018. Cherish your days my friends, as this time will only come once, YOLO. Oh, but what did it feel like again? What was the day like again? Gosh, am I that old now?

- Subhojoy Dey  
Systems Development Engineer at AWS

A jack of all trades!!

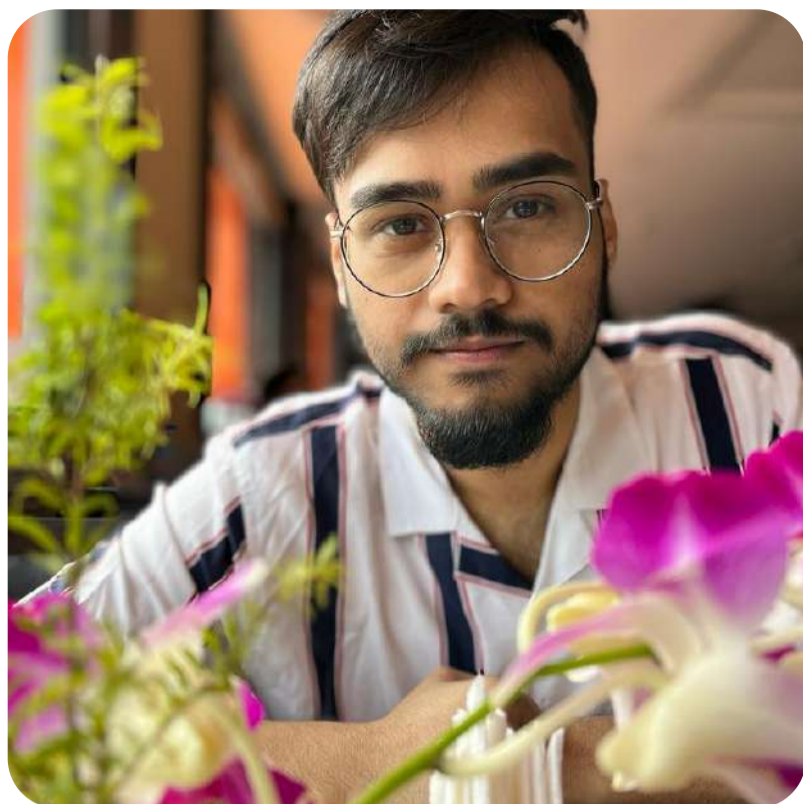

One who chooses their own path in their own time to achieve their goals. One who tries to enjoy everything they do, whether it is Karan Johar's "Student of the Year" or our college life. It doesn't matter for them whether they get a constant 10 pointer in all semesters but it does matter to them that they make enough memories with their friends, so that in the end of day its worth having that back pain. The one who chooses to pick up that dusty guitar once in a while to play "Te Amo". The one who picks up that sketchbook to carve out their imagination or to write down that poem or hymn that they have been humming throughout the day.

One who chooses to get up and do things rather than complain. The one that guides others but is always ready to ask others for guidance. In the end, they are the one who try to follow the path of truth but if asked to choose between kindness and truth, they sometimes do choose kindness. So, in this world full of masters empowering their perfection, its better to be jack of all trades and master of none cause YOU matter and what YOU do and how YOU choose to do does matter.

Whenever we think of IEM, we think about all the restrictions. But, I have very fond memories of my time at my Alma Mater. I volunteered and organised multiple events and festivals. Which meant I got to work with people from other departments, seniors, juniors, and professors. Many of whom have become family. I was part of E-Cell and Innovavión from my Freshman year. All these made my entire college experience a memorable one. I can hardly express how I want those days back. Sleepovers at college before an important event, asking Avijit Sir for a treat every other day, Sleepless Nights, The fun of organising events, Mass Bunks, Canteen Addas, Pranking Friends, and Professors. From working under Dadas to becoming one. And how can I forget IEDC Lab, the place we spent most of our time. I have learned so much through osmosis while just being there. IEM has a lot to offer; you need to look into the right places.

— Sumanjit Chowdhury  
Associate at PwC India

— ”

“ —

Not all places are meant to say Goodbye.... Few places become our Home too.... "

It was in the year 2018, when I got admitted to IEM, Kolkata. When I had come to know about this fact, strange clouds of confusion covered my mind sky. I never realized then that this College with such Strict Environment could eventually become my second Family.

From Security Uncle to our Librarian, everybody considered me a very own part of this Family. I was like a child to my Seniors because of the way they guided me. I was like a Teacher to my Juniors because of the way they had loved me. From getting the best group of Friends and Classmates to getting the Best Guidance from the Teachers, it was a journey that has made me the Person I'm.

Today as I work as the Assistant Manager, Marketing at BYJU'S (Think and Learn Pvt Ltd), I'm always guided by the Lessons I've learnt from my college.

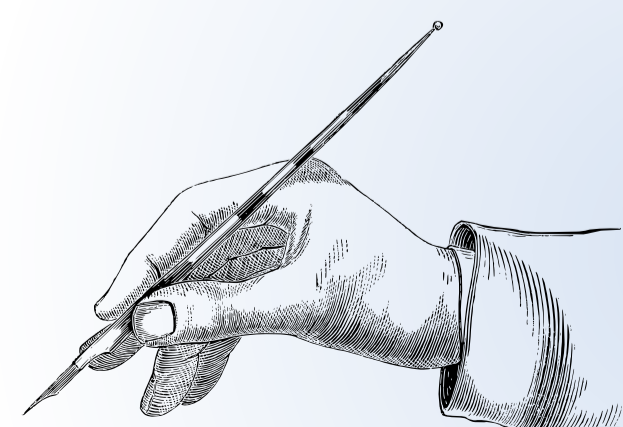

During our Placements, IEM supported us in the Best possible. From providing us the chance to apply to a plethora of Companies and Firms to guiding us at every possible step to ace our Interviews and Exams.

I would like to specially Thank my HOD Malay Sir and Sanghamitra Ma'am for their guidance and support throughout my College Life.

These years that I have spent at college shall always remain the most memorable years of my Life.

**--Shinjini Chattopadhyay**  
**Assistant Manager, Marketing at BYJU'S (Think and Learn Pvt Ltd)**

## IEM College Band(2009-2011), My Golden Moments at IEM

When I walk down the memory lane and think about my golden years spent in IEM, the first thing which comes to my mind is our college band. The time was full of opportunities for folks like me who always pursued music as a passion and wanted to make something substantial out of it. We started the band in 2009 and we named it Dump Terminal. I played bass for the band. Apart from me few others like Tathagata, Agniva from both Engineering and Ashram campus were the founding members of this band. Many members like Wriddh, Agnitra and Varun beyond IEM joined and enriched us over the period of time, and the energy was sky-high.

Throughout the years we Participated in many band & music competitions also played as guest performers in college fests like Xavotsav, Sanskriti and of course our college own fest IEMPACT. Starting from Bengali folk songs, Bollywood numbers to English classic rock songs, we played and explored a wide range of music. This band not only gave me the chance to be more passionate about my music but gave me the confidence to stand in front of hundreds of people and deliver something with great joy. We worked hard, practiced day and night but never felt tired because we wanted make ourselves successful and IEM proud. Nevertheless, I am grateful to the professors who encouraged our activities and provided us the extra support beyond the classrooms. At the end, all I can say is, most certainly those years will always be unforgettable for me and if I am lucky enough, one day I will be jamming again with my Dump Terminal fellas and we will have a grand reunion. Till then, auf wiedersehen!

--Sougata Kumar Laha

Dear Alma Mater

Thanks for giving this opportunity to remember those wonderful days of my life. It is the best days of my life because it's a turning point in my career where here I experienced success as well as a failure too. I still remember that the first day of my college where my mind is full of questions and confusion. which field I have chosen where I have stepped in every one is stranger how to behave with them but eventually things are in right place. We had a lot of interactive sessions during our orientation classes to know our batchmates as well as the professors also. I worked very hard in the first year I expected more marks but I fail to achieve my expectations. I made a challenge to myself that this failure has to become a stepping stone for my success. Yes! this challenge makes me success. It happened not only about my hard work but also happened due to the faculty support and guidance. Even though the other part of my college life is bunking the classes and making fun with my friends in the class and sometimes getting punished with the teachers, the things which I learned in college days are to participate each and every moment either it may be sports for entertainment or it may be Quizz to examine a knowledge power. I learned to be a unique, discipline, how to overcome a defeat etc. I stepped out from my collage with a degree of success. Simply and shortly I love my college and college make my future bright.

— ”  
- Sridatri Ghosh, 2018-21 BBA Batch  
MBA , United World School of Business

“

Dear Alma Mater,  
When I entered the premises I had a blurry image of my future, but as the time flew you made it clear and today, I feel to have a bright future.  
At this place I was trained under pressure and diamonds are made under pressure, am sure not to break in the toughest of the time!  
For the one last time,  
Thanks Alma Mater!!

## মা তোমার জন্য

কৃষ্ণেন্দু পাল

রোদ খেলে যায়, ঘুলঘুলি গায়ে, দেওয়াল আঁকে ছবি,  
ঘুম ওঁঙে যায়, মায়ের ছোঁয়ায়, 'আর কবে বড় হবি' ?

ঘুমের ঘোরে আঁচল টেনে বসিয়ে দিয়ে পাশে  
মায়ের কোলে মাথা রেখেই ঘুমটা আবার আসে।

মাথায় তার স্নেহের হাত, চুলে আকিবুকি,  
সময় ও তখন স্তব্ধ হয়, থামিয়ে দ্রুতি।

ঘড়ির ঘন্টা শুনে যখন সম্মিত ফেরে মা-র,  
চিৎকার করে বলতে থাকে- 'ওঠ এবার, কলেজ পাবি না আর'।

স্নান খাওয়া সেরে যখন লাগাই কলেজ যাওয়ার দৌড়,  
দরজায় দাঁড়িয়ে দেখো আমায়, দেখা যায় যতদূর।

বাড়িতে ফিরেই দেখাই মেজাজ, জমেছে যা সারাদিন,  
শোনো সব ই হাসি মুখে, অভিযোগ করোনি কোনোদিন।

সন্ধ্যাবেলার টিফিন কিংবা রাতেরবেলার খাওয়ার,  
কিটি নেই তোমার কোন, শ্রেষ্ঠ তুমি সবার।

চাঁদের হাসির চেয়েও অনেক দামি, তোমার মুখের হাসি,  
সবশেষে তাই বলছি মাগো তোমায় ভালোবাসি।

আমি হিন্দু, আমিই মুসলমান!  
কৃষ্ণেন্দু পাল

বোম পড়েছে পাশের পাড়ায়, রাত বিরেতে খুন,  
মোল্লাগুলো বড্ড পাজি, ভীষণ - জ্বালাতন।  
বোম পড়েছে, খুন হয়েছে, নেই তাতে দ্রুতি,  
কে করেছে, না জেনেও, জাতেই বোমা নিক্ষেপ!

আট বছরের ছোট্ট মেয়ে, খেলতে শিখেছে সবে,  
তাকেও তারা ছাড় দেয়নি, কাজ সেরেছে নীরবে।  
তাতেও আবার হিন্দু ব্রাহ্মীন, পুলিশ কর্তার কাজ,  
ধর্ষণ ভুলে ধর্ম দ্রোহ, রাম ভাঙার কাজ!

কদিন আর ধর্মের নামে, দোষীরা নির্দোষ হবে?  
কদিন আর টাকার জোরে, পাপীরা সাধক হবে?  
কদিন আর রাজনীতির ভয়ে, সত্যি মিথ্যা হবে?  
কদিন আর এই সমাজে নির্ভর্যার মৃত্যু হবে?

হয়তো মৃত্যু নির্ভর্যাদের নয়, এই মনুষ্যত্বের হয়,  
হয়তো মৃত্যু শিশুদের নয়, এই সমাজের হয়।  
তবু আশার আলো বুকে বেঁধে ভয়কে করি জয়,  
মৃত্যু যেন মনুষ্যত্বের নয়, ধর্ম রাজনীতির হয়!

তবুও, মন্দির তুমি আজ শ্মশান!  
আর মসজিদ - তুমি কবরস্থান!  
আজকে আমি মানুষ নই,  
কেবল হিন্দু মুসলমান!

-- Krishnendu Paul
